

IP Scaled Suction Catheters

NEW

All along IP Procedures, operators need suction catheters for :

- Aspiration of liquid and smoke.
- Palpation of tissue with Atraumatic Tip

In addition transparency of the catheter is important to validate aspiration process on site.

Taking advantage of it and considering their need to get dimension estimation of the field they work in, we added marks on the catheters to help them in this purpose.

These catheters become the first of its type on the market.

	Reference	Outer / Inner Diameter (mm)	Working Length (mm)	Angled Handle
